STRETCH ACOUSTIC FABRIC SYSTEM

Stretch Acoustic Fabric System absorbs sound, minimizes sound reflections and creates a more comfortable acoustic environment where speech is intelligible, and loudness is reduced.

Suitable for both wall and ceiling, Stretch Acoustic Fabric System is ideal for a wide variety of application such as offices, meeting room, music studios and churches. Our wide range of fabric swatches enables you to create the ideal look for your space.

Product Specifications

Maximum Width	1200mm
Maximum Height	Customisable
Thickness	25mm
Fabric Composition	100% polyester fibre (PET)
Sound Absorption (ASTM C423-17)	NRC 0.75
Fire Rating (Infill)	Class 0

Key Features

Recyled Material
Raw materials consist of recycled post-consumer products e.g. plastic bottles.

Green Material
Sustainable manufacturing process free from chemicals, binders & adhesives.

High Sound Absorption
Helps to dampen noise & promote excellent acoustic performance in comfort.

Anti-rot & Anti-fungi
Able to withstand harsh environment & external weather without rotting.

Low Moisture Absorption
Retains moisture in ambient air & controls humidity by absorbing & emitting less.

Non-flammable
Product will melt & self-extinguish in case of contact with fire.

Fire Regulations
Complies with BS 476 Part 6 & 7 fire requirements under Singapore FSB regulations.
